

Environmental Sustainability Policy Statement

At WestWaters Hotel & Entertainment Complex, "experience is everything", and this is at the heart of everything we do. We believe we have an important role to play in ensuring that this experience is available for everyone, and that we make a contribution to the ongoing liveability of the area.

One key way we can do this is to ensure we are as environmentally sustainable as possible. WestWaters Hotel & Entertainment Complex acknowledges a responsibility to the environment, and we express our commitment towards implementing practices which will promote environmental sustainability. The following policy governs the management of the environmental aspects of our business, with specific focus on the conservation of resources and the reduction of waste.

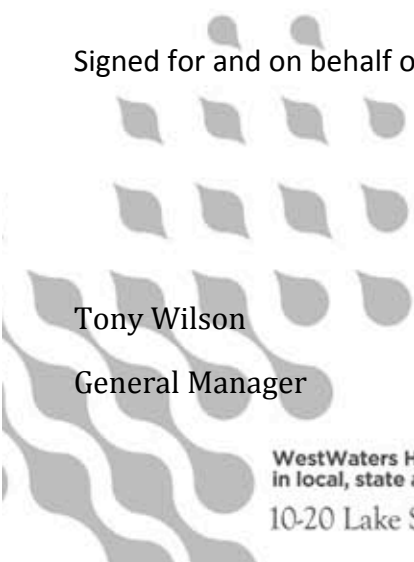

This policy relates to how all operations throughout WestWaters Hotel & Entertainment Complex will be continually reviewed and improved, so that we will truly be able to integrate environmental and social considerations into our everyday practices.

We will consistently strive to raise awareness in the community, encourage participation and train employees in environmental matters.

Principles

- Comply with any laws governing the environment, and actively look for ways to improve on these guidelines.
- Work towards the conservation of energy, water and resources in all our operations.
- Strive to better understand both the direct and indirect impact that our practices may have on the environment.
- Promote environmental awareness throughout all operations of the company.
- Provide training and information to staff on implementing our sustainable policies.
- Dispose of waste thoughtfully, and develop an attitude of "reducing, reusing and recycling."
- Lessen our environmental impact by purchasing environmentally-friendly products and services.
- Work with our entire supply chain in order to gain mutual benefits of incorporating environmentally sustainable goals into everyday business.
- Regularly review our business practices, and determine whether each practice is suitable in an environmental context.
- Independently audit our practices, and determine whether our goals have been reached.
